

# AIRSENSE™

## HOME VENTILATION RANGE

**HRV AirSense™ is home ventilation, reinvented. From the fan housing in your roof to the outlets in your rooms, our system has been redesigned and reengineered with New Zealand homeowners in mind.**

**The HRV AirSense™ range features four models, so there's sure to be one suited to your home and budget. Your HRV AirSense™ installation will be custom designed for your home and installed by one of our own trained installers.**

**HRV Lite™** is the affordable, capable New Zealand home ventilation system that's scientifically proven to reduce moisture<sup>1</sup>, and helps prevent mould.

**HRV Essential™** adds in-line flow controllers for optimising airflow to each room, a wider Smart Touch control panel and our new HRV app for complete system visibility and control.

**HRV Essential+™** supports year-round comfort by adding an HRV Summer Kit, drawing fresher and cooler outside air into your home, delivering more air, more often.

**HRV Balanced™** is a fantastic choice for modern homes with tightly fitting doors and windows. This model adds an air outlet to allow balanced airflow. In the winter, its heat exchanger uses energy from the outgoing air to warm incoming air, so the system removes moisture, not heat.
