

# AIR TRANSFER KIT

HOME VENTILATION ACCESSORY

Air Transfer Kit

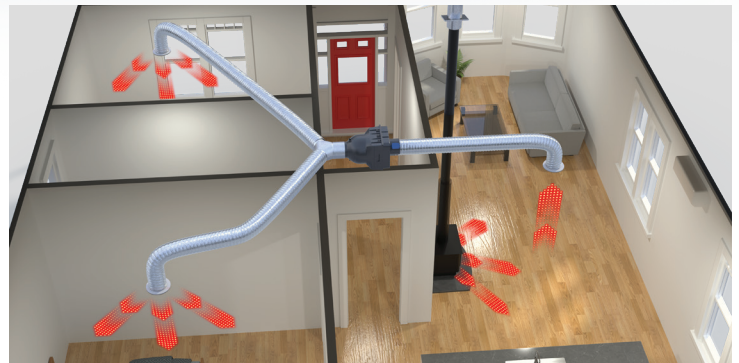

Smart Touch controller and app

## EFFICIENT BALANCING OF TEMPERATURES IN YOUR HOME

Distributed latent temperature (heating or cooling) to other areas in your home

FEATURES	BENEFITS
Automated detection of uneven temperatures	Warm or cool air is pushed into other areas in your home
Centrifugal fan and insulated ducting	Innovative fan design creates pressure to push air rather than blow it, warming your house quicker
EC <sup>i</sup> fan	Provides an even higher static pressure with a lower pressure drop than an AC <sup>ii</sup> fan
Touchscreen keypad	Set and forget technology – intuitive and user friendly control of your environment
PM1 inline filter	Filtration as well as air movement
UPGRADE OPTIONS	
Easy upgrade option for HRV AirSense™ and existing HRV ventilation systems	

i. Electronically-commutated ii. Alternative current
