

AIRSENSE™

THE NEXT GENERATION
OF HOME VENTILATION

OUR PURPOSE AT HRV

At HRV, our purpose is to make all kiwi homes healthier.

Since 2003, we've helped 500,000+ Kiwis tackle some of the healthy home issues we face in New Zealand.

AirSense™ home ventilation brings fresh dry air into the home and is scientifically proven to reduce moisture¹, and helps prevent mould... to give all New Zealanders the best in home health and comfort.

HRV AirSense™ is approved by BRANZ, Allergy NZ, Sensitive Choice and is a 'Friend of the Foundation', a business sponsorship programme of the Asthma and Respiratory Foundation NZ. HRV is also New Zealand's most trusted home ventilation brand, as voted by New Zealanders in the 2022 and 2023 Reader's Digest Trusted Brands Survey.

1. Based on a scientific study of 15 New Zealand homes conducted by Unitec Institute of Technology (Auckland) on behalf of HRV during winter and spring 2021. Results may vary depending on design and geographic location of a home.

HEALTHY HOMES AT A GLANCE

At HRV, we say everyone should love the feeling of coming home. But there's more to what we do than just a feeling! Here's some of the science that sits behind what we do.

DOWN WITH DAMP!

Dampness and mould growth can exacerbate asthma and increase the risk of asthma onsetⁱ. Indoor dampness and mould is also associated with an increased risk of respiratory tract infections and bronchitisⁱⁱ.

VENTILATE AND BREATHE EASY

Ventilation helps remove or dilute indoor airborne pollutants coming from indoor sources. This reduces the level of contaminants and improves indoor air quality (IAQ)ⁱⁱⁱ.

TOO COOL (AND DAMP) FOR COMFORT

Half of New Zealanders surveyed who own or rent their home have moved house in the past five years. More than one in five (21%) said that warmth, damp or mould was the main reasons for doing so^{iv}.

3RD LEADING CAUSE OF DEATH

Respiratory disease affects 700,000 people in New Zealand and is the third leading cause of death. Asthma alone affects 1 in 8 adults and 1 in 7 children in New Zealand^v.

HOME VENTILATION EXPLAINED

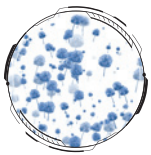

HRV AirSense™ is a New Zealand home ventilation system that's scientifically proven to reduce moisture¹, and helps prevent mould.

We worked closely with researchers at Auckland's Unitec to test HRV AirSense™ home ventilation in real-world conditions. The results speak for themselves.

LESS MOISTURE¹

In a study of 15 homes over 12 weeks, most homes with HRV home ventilation showed reductions in humidity.

PREVENT MOULD

In the same real-world study, homes with HRV home ventilation were observed (by homeowners) to help prevent mould.

BREATHE BETTER AIR

In the Unitec real-world study, levels of particulate matter (things like dust, pollen and mould spores) and carbon dioxide all dropped when HRV home ventilation was installed.

A HOME THAT'S EASIER TO HEAT

Damp air takes more energy to heat than dry air². So reducing moisture levels with HRV home ventilation means you'll need less energy to stay warm, whether that's electricity, gas or even firewood.

A SAFER, QUIETER HOME

Opening all your doors and windows will certainly help with ventilation, but that's not always a great idea. Open windows can let in street noise, pollution and cold air, and you don't want to leave doors and windows open when you're out! With HRV home ventilation your home is being ventilated 24/7, even when all the doors and windows are closed.

HRV Essential™

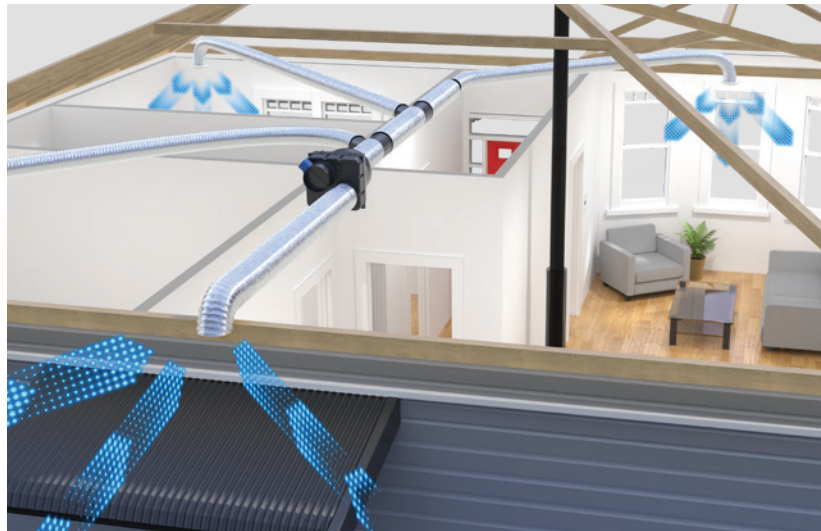

For full visibility and greater control of your HRV home ventilation system, step up to HRV AirSense™ Essential. Your Essential system adds a wide-screen Smart Touch control panel showing a wide range of air quality information including humidity, volatile organic compounds (VOCs) and CO₂. AirSense™ Essential also allows complete system control and visibility via the AirSense™ app.

HRV Essential+™

Summer Kit draws fresher, cooler air inside

Want to make every room the coolest room in the house? AirSense™ Essential+ shines in summer, bringing cooler air from an outside wall on the southern side of your home and adding it to the ventilation mix. Just set the desired temperature on your Smart Touch panel or app and let AirSense™ Essential+ take care of the rest.

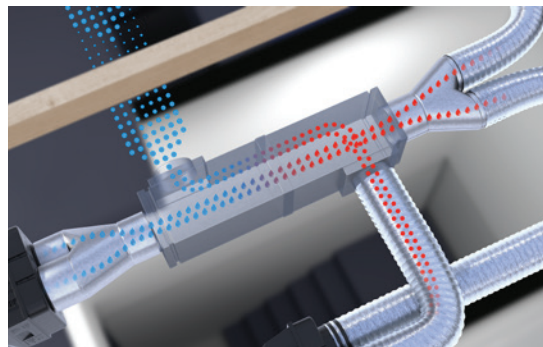

HRV Balanced+™

Heat recovery efficiency

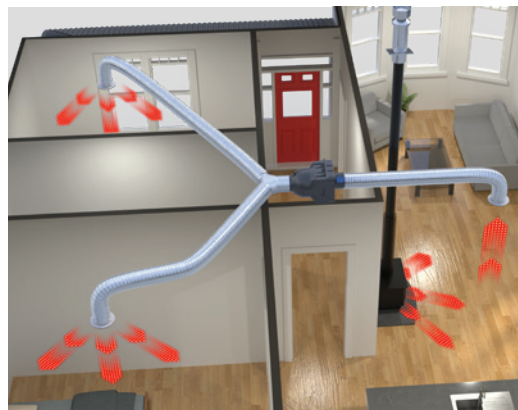

If you want the ultimate in home ventilation or the outside temperature is colder than the inside temperature for prolonged periods of time AirSense™ Balanced+ will help solve that problem.

AirSense™ Balanced+ features a heat exchanger, capturing heat energy from outgoing air. So you pump out the damp, stale air, not the heat!

Heat exchanger

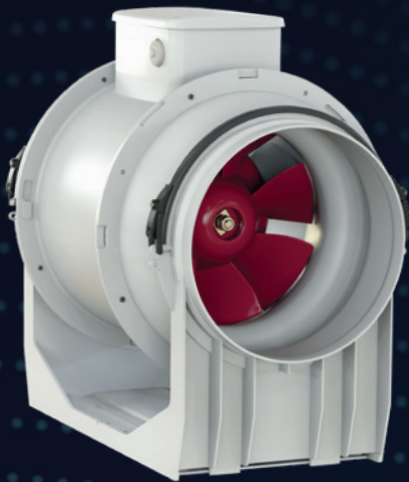

Air Transfer Kit option

The HRV Air Transfer Kit is an optional accessory to the HRV AirSense™ range. It uses a centrifugal fan to evenly distribute warmer or colder air to all other rooms of the house.

THE HRV ACCESSORY RANGE

While your HRV AirSense™ home ventilation system forms the heart of your home health and comfort solution, our accessory range lets you add the finishing touches.

VORTEX EXTRACTOR FAN

Even with an HRV home ventilation system operating, some rooms in your home need fast, targeted moisture removal. A Vortex extractor fan in your bathrooms or laundry provides powerful extraction of moist air when you need it, where you need it.

INTELLISWITCH CONTROLLER

A Vortex extractor fan can also be paired with an optional HRV IntelliSwitch which is an automatic timer to allow your extractor to do its job and then automatically switch itself off, even when you've left for work.

CAVIUS SMOKE ALARM

The Cavius Wireless Family Mains Powered Photoelectric smoke alarm has the optimal chamber size for photodiode amplifiers and a micro-controller, which ensures precise signal processing. The Wireless Family alarms interconnect to each other using innovative radio frequency technology so when one alarm activates, they all sound.

HOW HRV MAKES IT EASY

Choosing, buying and owning an HRV product should be a breeze – so we've worked hard to make sure it is!

PROFESSIONAL INSTALLATION

Your HRV installation team is trained to give you a smooth installation experience and a tidy finished result.

CUSTOMER CARE ON CALL

Just call 0800 478 123 to connect with one of our super-friendly, experienced team. They love to help!

EXPERT SERVICING

Your HRV built or installed product is designed to give you many years of trouble-free operation. Regular servicing is key to that, so we stand by and service everything we sell.

VENTILATION'S JUST THE START!

At HRV you'll find trusted solutions for many other parts of the home, like heating and cooling, water filtration and even EV charger installation.

FINANCE OPTIONS TO SUIT

Transform your home's health now, and spread out the payments. Scan the QR code or visit hrv.co.nz/finance to see our latest finance offers.

(Credit and lending criteria and fees apply.)

Use your Airpoints Dollars™! towards your HRV home ventilation. HRV is New Zealand's only home ventilation provider that lets you pay up to \$1500 of your new system with Airpoints Dollars™ at the Airpoints™ Store. Excludes HRV Lite. The HRV Ventilation purchase must be at full RRP.
