	Restore defaults	More
		North States

"WPS Connect" button will change to the words "Upgrade Firmware" (see below):

'PRESS'

Upgrade firmware

Wi-Fi & Cloud fields will change to Please Wait

IF POWER IS DISTURBED AT THIS POINT, THEN THE UPDATE WILL FAIL

When the upgrade has completed, Wi-Fi will change back to **Connected** and Cloud to **Available** (as above screen-shot).

This will take around a minute to complete.

If in the rare case that you get "**Wi-Fi Connected**" and "**Cloud Not Available**" Press "**Restore defaults**". The Wi-Fi will change to '**Not Connected**' & the Cloud will

change to 'Not Available'.

Turn Wi-Fi Module to OFF (slider switch)

Then Turn the Wi-Fi Module to ON

Wait around 30 seconds for "Wi-Fi Connected" and "Cloud Available" to appear.

If connection does not happen, then press and hold the top grey block again (with the SSID in it), until the **WPS Connect** and **Manual Connect** buttons reappear.

	 Wi-Fi 	
	SSID: InvisionNet Wi-Fi: Connected Cloud: Available Product ID: xcj3aaj7s28	IMPORTANT O When connect data will be co system health future product HRV cares abo
	Wi-Fi Module	You can read H at: www.hrv.co
	WPS Connect	
	Manual Connect	More

Then reconnect to the Wi-Fi (WPS or Manual).

If after you have completed these steps and the Cloud is still **Not Available** recheck that the internet connection (Not Working, out of data etc.)
