

THE ADVANTAGES OF USING GENUINE HRV FILTERS

HRV filter

- HRV filters will last up to two years before needing replacement.
- Deep pleat construction increases the surface area of the filter, meaning more dust captured
- The Nano-Fibre layer has natural antibacterial qualities*
- The SETA™ Nano-Fibre layer is made with fibres 500 times thinner than a human hair to help trap allergens*

HRV filters are made in NZ
Using genuine HRV filters will ensure the manufacturer's warranty is maintained

HRV Ventilation systems have Sensitive Choice accreditation for their ability to help reduce triggers of asthma and allergies from the air in your home

F8 Eurovent efficiency rating, meaning they are over 90% efficient at capturing particles as small as 0.4micron**

Genuine HRV filters are the only filters made with SETA™ Nano-Fibre technology
