

HRV AIRSENSE™ WOOLCARE™ FILTER

WOOLCARE™ FILTER

- 5 layers of filtration for higher efficiency
- Filters dust, pollen, mould spores and other common allergens from the air you breathe
- Pleated base layer is made from recycled New Zealand wool for maximum filtration effectiveness
- Features nanofibre filtration technology, FilterLayr™, that helps to improve your home's indoor air quality by filtering out particles as small as 0.3 microns¹
- Meets both ePM1 and MERV 15 ratings according to ISO 16890:2016 and ANSI/ASHRAE – 52.2-2017 standards respectively

5 LAYERS OF FILTRATION FOR HIGHER EFFICIENCY

- A. Recycled New Zealand wool base layer
- B. Pre-filter
- C. New Zealand-made FilterLayr™ antimicrobial nanofibre
- D. Polypropylene
- E. Carbon filter

WOOLCARE™
FILTER

EXPERT SERVICE = PERFORMANCE YOU CAN TRUST

Like any filter, over time your genuine HRV filter will become clogged and lose efficiency. That's why it's important that we change your filter and service your system every two years.

Changing your filter(s) is just one part of an HRV service. Your technician will work through a 12-point checklist to make sure every part of your system from the fan unit in your roof space to your outlet vents is in top condition.

If your filter change light is flashing, give us a call on 0800 HRV 123.
